Èric Vega Noguera.

SOFTWARE DEVELOPER · .NET

.NET software developer with almost 3 years of experience in industrial and ERP environments. I currently evolve APM's in-house ERP with C#, VB.NET and SQL Server; previously I built business applications, SSRS reports and a GMAO web application at a manufacturing plant. I specialise in modernising legacy code (VB6 to C#) and applying SOLID, design patterns and Clean Architecture. Ongoing training in web development and game programming with Unity.

LOCATION
Manresa, Barcelona

TECH STACK

CORE
C#, VB.NET, VB6, .NET Framework 4.8, WinForms, SQL Server, T-SQL, SSMS, SSRS, Visual Studio

WEB AND DATA
JavaScript, HTML, CSS, React, Node.js, Express, REST APIs, MongoDB, PostgreSQL, MySQL

PRACTICES
SOLID, design patterns, dependency injection, Clean Architecture, query optimisation, agile methodologies, Git, Subversion, GitHub Actions

LEARNING
TypeScript, LINQ, Entity Framework, Docker, Azure, Unity

LANGUAGES

Catalan	Native
Spanish	Second language
English	Intermediate (B1)

EXPERIENCE

Software Developer
Jul 2025 – Present

APM Comercial Informática, S.A. · In-house ERP software

- Development and evolution of the company's own ERP using C#, VB.NET and .NET Framework 4.8 (WinForms) on SQL Server.
- Modules covering purchasing and requirements, goods receipt, stock and inventory, manufacturing and production orders, packaging, sales, invoicing and invoice allocation.
- Gradual migration of legacy VB6 applications to C#, plus maintenance of VB.NET systems.
- T-SQL queries and performance tuning in SQL Server (SSMS).
- Application of SOLID, design patterns, dependency injection and Clean Architecture.

Full Stack Developer
Oct 2023 – Mar 2025

Casa Mas Alimentación · Manufacturing plant · food sector

- Development and maintenance of .NET applications and SQL Server database administration.
- Creation and management of reports with SQL Server Reporting Services (SSRS).
- Built a new responsive GMAO (maintenance management) web application that replaced an obsolete system, improving efficiency and compatibility.
- Supply analysis system to improve purchase forecasting and inventory control, aimed at reducing costs and losses.
- Handling of incidents, tickets and continuous-improvement projects, with version control in Git and Subversion.

Operator
Oct 2021 – Nov 2022

DENSO

- Quality control of electronic components and production tracking and control.

Earlier experience: Repsol (cashier, 2020–2021), Montserrat Abbey (security guard, 2015–2019) and Info7 (IT technician, internship, 2015).

EDUCATION

Game programming with Unity · Ongoing
Continuing education

Full Stack Web Development Bootcamp · Feb – May 2023
Ironhack, remote (9-week intensive)

Higher Vocational Degree in Automotive Technology · 2019 – 2021
Institut Milà i Fontanals, Igualada

Intermediate Vocational Degree in Microcomputer Systems and Networks · 2013 – 2016
INS Castellet, Sant Vicenç de Castellet

Higher Vocational Degree in Web Application Development (1st year) · 2012 – 2013
Institut Milà i Fontanals, Igualada

Certifications: Web Development (Ironhack, 2023) · HTML, CSS and JavaScript (OpenBootcamp, 2023) · Testing Ruby with RSpec (2022).
